QUOTA CONTROL & STUDENT TRACKING HISTORY

- How were quotas granted?
- How was student throughput tracked?
- What problems did this create?

QUOTA CONTROL & STUDENT TRACKING

- What couldn't we do under this system?
 - Provide PERS with accurate/timely student data by course or UIC
 - Track student course completion by UIC
 - Compare course utilization rates by platform
 - Correlate course utilization rates to Alcohol Related Incidents

WHAT IS STASS?

Standard Training Activity Support System

- Provides standardized comprehensive day-to-day integrated automated classroom support that feeds corporate level data to NITRAS (legacy system).
- STASS and NITRAS are the main training data sources for the Navy's newest training data "warehouse" - NTMPS.

CINs

All NADAP courses will have Course Identification Numbers (CINs) and can be found in CANTRAC:

DAPA	S-501-0100
ADAMS FAC	S-501-0110
ADAMS SUP	S-501-0120
ADAMS LEADERS	S-501-0130
UPC/NDSP	S-501-0140
AWARE	PENDING
PREVENT	PENDING

WHAT IS NTMPS?

Navy Training Management and Planning System

- NTMPS is a relatively new, Navy-wide database for capturing and tracking all Navy formal and informal training.
- NTMPS has the full support of CNO, Commander, Fleet Forces Command, Commander-in-Chief Atlantic Fleet, and Commander-in-Chief Pacific Fleet.
 - NAVOP 04/01
 - COMFLTFORCOM Norfolk message 261818Z OCT 01

NTMPS

NTMPS helps every level of user (training activity, individual command, ISIC, TYCOM) by providing users with a single computer-based tool to manage school requirements with displays that can be sorted by platform, school locations, Unit Identification Code (UIC), manning, school attendance, and NECs (where applicable). It also has a specific goal of making training and the tracking of training easier for deployable forces.

NTMPS

-
- TYCOM training requirements
 - TYCOM homeports
 - CPATS (NAVEDTRACOM funding data)
 - TRARAD (Pentagon funding for data)
 - TFMMS (total force manpower)
 - OPINS (officer personnel data)
 - EMF/NES (enlisted personnel data)
 - SCLSIS (ship configurations)
 - NFADB (facilities database)
 - RSTARS (reserve training data)

NTMPS

The power of NTMPS comes from its timeliness- its use of TFMMS, OPINS, EMF/NES, etc.- to update frequently and provide almost real time data.

www.ntmps.navy.mil

NTMPS

-
- **What can NTMPS do for YOU?**
 - ADCOs: Search your regional UICs by the Course Identification Numbers (CIN) to run data reports
 - DAPAs: Easier tracking of your command's attendance in all NADAP courses.
 - Provide timely, accurate reports to your COC
